Summary

AI Engineer and Backend Software Engineer with hands-on experience building scalable APIs and AI-driven applications using Python, TypeScript, Fastify, and Flask. At [webeet.io](#), contributed to microservice-based backend services by implementing HTTP validation layers, DTO schemas, and CQRS endpoints that improved API reliability and maintainability. Skilled in LLMs, Generative AI, RAG systems, and backend development, and motivated to build intelligent systems and robust, scalable software platforms.

Technical Skills

Python, JavaScript, TypeScript, Flask, Node.js, REST APIs, Fastify, SQL, SQLite, SQLAlchemy, HTML, CSS, Git, GitHub, LLMs, Prompt Engineering, RAG, AI Agents, Unit Testing, pytest, Software Engineering Intern (Webeet.io | 2026)

Soft Skills

Problem-solving, Teamwork, Communication, Fast Learner, Adaptability

Experience

Webeet.io Software Engineer Link	Jan 2026 - Mar 2026 Remote
---	--------------------------------------

Software Engineer — [Webeet.io](#)

- Implemented HTTP validation layers for backend services using Fastify, TypeScript, and Zod, improving request validation and API reliability.
- Developed DTO schemas and validation hooks for agent configuration endpoints in a microservice architecture.
- Contributed to backend services in a CQRS-based system, working across query and command services.
- Collaborated with engineers through GitHub workflows, pull requests, and code reviews to ensure clean architecture and maintainable code.
- Debugged API endpoints and tested services using curl, Node.js runtime, and local development environments.

Lidl GmbH Order Picker	Oct 2021 – Dec 2024 Winsen/Luhe, Germany
----------------------------------	--

- Operated advanced electric logistics machinery to process 2000+ warehouse orders daily for Lidl supermarkets across Germany.
- Ensured timely preparation and dispatch of goods, helping maintain a 98% on-time delivery rate and high customer satisfaction.

Fricke Warehouse Logistics Associate	Oct 2020 – Sep 2021 Heeslingen, Germany
--	---

- Operated forklift to move and store 150+ pallets daily, ensuring safe and efficient warehouse flow.
- Used handheld scanners to track and update inventory records with 99% accuracy.

Language Acquisition German Course	Jan 2019 - Sep 2020 Winsen/Luhe, Germany
--	--

- Completed professional orientation and German language course, strengthening workplace readiness and achieving advanced communication skills.

Amazon Mail Order Company Packer	Sep 2017 – Dec 2018 Winsen/Luhe, Germany
--	--

- Packaged and sorted 3000+ customer orders daily, maintaining accuracy and meeting tight shipping deadlines.
- Consistently achieved a 98% order accuracy rate while working in a fast-paced, high-volume warehouse environment.

Education

Masterschool Software Engineering	Jan 2025 – Mar 2026 Training Program
- Acquires hands-on experience through an immersive program, developing full-stack applications using HTML/CSS/JavaScript, Flask, API, and SQLite database. - Applies software engineering principles such as object-oriented programming (OOP), test-driven development (TDD), and version control (Git, GitHub) in real-world projects. - Builds and deploys scalable applications using RESTful APIs, cloud services, and CI/CD pipelines, improving system performance and maintainability.	

Development and Work plus GmbH Mechanic Engineering	Feb 2015 - Jul 2016 Vocational Training
---	---

Projects

Career Coach Web App Link	Sep 2025
- Developed an AI-powered career coaching web application that analyzes resumes, generates professional cover letters, and provides personalized career advice. - Implemented resume upload functionality and AI-driven feedback through backend APIs with a user-friendly interface for managing career documents. - Tech: Python, Flask, REST APIs, Generative AI, Prompt Engineering, NLP, HTML, CSS, Git	

Movie-Project Link	May 2025
- Built a movie search web application that retrieves film data from the OMDb API and stores results using SQLite and SQLAlchemy. - Developed dynamic pages using Jinja2 templates to display movie posters and details. - Implemented search functionality and robust error handling for API failures. - Tech: Python, SQLite, SQLAlchemy, Jinja2, REST API	

Best-Buy-2.0 Link	May 2025
- Developed a Python-based store management application supporting product listing, purchasing, and inventory handling using object-oriented programming with inheritance. - Implemented promotional pricing logic including dynamic discounts such as “30% off”, “second item half price”, and “buy 2 get 1 free”. - Built a static HTML catalog generator for product display and ensured reliability through unit testing using pytest. - Tech: Python, OOP, HTML, pytest	

Certifications

AI Beginner Guide Simplilearn View Credentials	Jun 2025
Software Engineering Intern — webeet.io webeet.io View Credentials	Jan 26 - Mar 2026
AI Engineering & Software Engineering Program MSIT GmbH (Masterschool) View Credentials	Jan 2025 – Mar 2026
